

CARHARTT® POLARIZED EYEWEAR BY PYRAMEX®

With a Focus on Precision, Passion and Protection, Carbondale® and Spokane® Eyewear Models are a Must Have for Shooters and Outdoor Enthusiasts Alike

Whether you're an avid shooter, angler or hunter, a great pair of glare-cutting shades can make all the difference in how you enjoy your experience outdoors. Pyramex® has a vision for creating the best looking and performing eyewear that both enhances and protects your vision in the great outdoors. It's why the company is proud to offer its new Carhartt® polarized eyewear models Carbondale® and Spokane®, which are both designed to be comfortable, stylish and highly functional.

Polarized lenses are recommended by ophthalmologists and optometrists alike to cut reflected glare and improve vision and safety. When shooting, for example, being blinded by glare can seriously hinder an ultra-precise shot. Polarized lenses work to block horizontal rays which reduces reflections and eliminates glare. It also results in reduced eyestrain and higher visual comfort.

Both the Carbondale and Spokane models feature highly durable and lightweight polycarbonate lenses. See colors better with a built-in laminated filter, which works to improve contrast and visual clarity, allowing for true perception of colors. The lenses are scratch-resistant and provide 99 percent protection from harmful UV rays. Both models meet ANSI Z87.1+ and Canadian (CSA Z94.3) safety standards. This means your eyes are well protected even under the most extreme situations.

The Spokane glasses have a unique half-frame ideal for active lifestyles. Featuring a streamlined design, the uber-strong frame and lens both made of polycarbonate, a material 250 times stronger than glass. A flexible rubber nosepiece and co-injected temples offer all-day comfort. Choose from three styles of Spokane polarized glasses: Sandstone Bronze Lens with a Black and Tan Frame; Gray Lens with a Black and Tan Frame; or Blue Mirror Lens with a Black and Tan Frame.

With a sleek and ergonomically sensitive full-frame design, the Carbondale glasses are as good-looking as they are functional. Constructed of a hard-wearing nylon frame and polycarbonate lens, the eyewear has a flexible rubber nosepiece and co-injected temples which offer the maximum amount of comfort. Polarized Carbondale glasses are available in three styles: Sandstone Bronze Lens with a Black and Tan Frame; Gray Lens with a Tan Frame; or Gold Mirror Lens with a Black and Tan Frame.

Pyramex Safety delivers high quality safety products through its innovative and stylish product lines. The company designs and manufactures a variety of personal protective equipment from eye, head, hand, welding, cooling and hearing protection to Hi-Vis work wear, respirators and ergonomic gear. Founded in 1991, the company has more than 2,000 distributors in over 60 countries and is committed to investing countless hours to research, design and testing to ensure Pyramex products meet the highest industry safety standards.
